The Venus Mysteries from the Ancient Sumerians to Current Time

We will explore how the story of Inanna descending into the underworld and returning describes the details of the physical cycle of Venus as she moves through the Morning Sky, Underworld, Evening Sky and Retrograde Underworld. We will also look at what it means for all of us collectively and why this upcoming Venus Cycle is so important.

Saturday Workshop, March 11, 1 - 5:00 pm,

The Magic and Mystery of the Greater Venus Synodic Cycle

We will take a deeper dive into the Venus Cycle in a personal way. Where was Venus in her cycle when you were born and why is it significant to you? What Meta-Goddess (a.k.a Overtone) was playing out in the collective consciousness when you were born? What insights can we gain from that?

Example: Cayelin's twins Ian and Jenna (age 31) have Evening Star Venus in Aries with a Leo Overtone. Both have different ways of being in the spotlight. Ian is a performer (including doing stunts) at Theme Parks around the world. He writes movie scripts and is a song writer while also performing as a musician. Jenna competes in athletic events (including an Iron Man in November 2015) and has created a huge community that really loves her. She is extremely charismatic, entertaining and fun. Cayelin, with Evening Star Venus in Aries with Scorpio Overtone prefers to be less visible, working behind the scenes, while relentlessly pursuing her passion of furthering Shamanic Astrology.

Cayelin Castell is the co-founder of the Shamanic Astrology Mystery School and creator of the Celestial Timings now in its 22nd year. Cayelin attended her first Shamanic Astrology talk at the Tucson Astrologers Guild in May of 1990 and has been on this path ever since. In 2014 Cayelin co-created and collaborated with Tami Brunk to create [Venus Alchemy](#), ceremonially celebrating the 19 month cycle of Venus as it relates to the story of Inanna. The inspiration for this came from helping clients make the most of their Venus Return Cycle over the past 25 years.
