

# TUCSON ASTROLOGERS' GUILD

November 10 & 11, 2017  
Wade Caves

---

Plaza Arboleda Conference Center,  
2502 N. Dodge Blvd.  
Manzanita Conference Room

**Friday November 10, 2017, 7:30 pm**

\$10/\$15 Member/Non-member

***The Solar Principle: Planetary Phases and Their Applications.***

Astrologers often ruminate on the nature of lunar phases, but all planets undergo the process of increase and decline in their synodic cycle with the Sun. Through phase's influence on speed, brilliance and motion, the working astrologer is able to glean physical, practical and psychological descriptions for use in consultation.

**Saturday, November 11, 2017, 1 – 5:00 pm**

\$20/\$25 Member/Non-member

***The Divinatory Art of Horary Astrology.*** Horary astrology is a remarkably decisive technique that allows both astrologer and client to cut to the chase of a seemingly unsolvable dilemma. Through chart delineation, the client's range of options are assessed and thoroughly explored. In this workshop we will study the guiding principles of horary technique, using both historical and modern examples. We will explore charts related to relationships and pregnancy, career and finance, missing objects and more, with a mind to what is generalizable across fields of questioning. Suitable for all levels, regardless of prior horary experience.

**Wade Caves**, based in San Francisco, USA, is an astrological consultant, speaker and educator specializing in horary, electional and classical astrological technique. Wade was certified with honors from the Mayo School of Astrology in London, and is well versed in both traditional and modern psychological methods of chart delineation. Wade's passion and focus is not only in understanding the historical and philosophical origins of astrological symbolism, but finding new and reliable ways to put this information to good practical use in a consultation setting. He is the editor and annotator of the 300th anniversary edition of *William Lilly's History of His Life & Times* (Rubedo Press, 2015).

Wade received his certification as a horary practitioner from Deborah Houlding's School of Traditional Astrology (STA) in 2013, and now serves as a faculty member. He began tutoring for the STA in October 2015 and delivers the Practitioner's Level Horary Course as an intensive attendance program.

**FREE BEGINNER'S CLASS on Saturday, November 11, 11 am to 12:00 pm: *Planetary phases and how they work in our lives.*** The Sun/Moon relationship is the most visible example of phases. We'll start there and then touch on Venus and other planets. Facilitated by TAG professional member Gael Chilson.
