Quintile Magic

In astrology, we tend to focus on the aspects that divide the zodiac (and chart) circle by 2, 4 and 8 for jolts into action, and 3 and 6 for gentler prods. So what about 5? Quintiles and bi-quintiles (fractions of one-fifth and two-fifths) are associated with the Venus-Earth-Sun interplay and represent lovelier qualities like luck and talent. When they form a triangle, they really amp up their positive prospects! We'll explore interpretations of their potentials in natal charts and see how to work with them in various forecasting techniques, such as progressions, transits, returns and lunations. Bring your chart! (If you need a chart contact GaelChilson@gmail.com)

Saturday Workshop, November 9, 1 – 5:00 pm,

\$20/\$25 members/non-members, UA and PCC students \$5 off with ID.
OPEN to all levels of knowledge of astrology.

CHART YOUR 2020 — Find out how the planets will affect **YOUR** chart in 2020.

We'll begin with an examination of the key aspects and patterns heading our way in 2020 – and there are some biggies! Then we'll look at how these line up with the planets and houses in the charts of participants and brainstorm ways to best utilize the planets' influences and avoid their pitfalls.

You will receive worksheets with the planets' key aspects and stations organized in two ways: chronologically and by zodiac position, as well as *Janet's Plan-its 2020 On a Page*, Janet's handy one-page bar chart with the dates and degrees for the planets' retrogrades and "shadows" as well as the year's New and Full Moons.
