Raquel Spring:

The Nodal Shift into Taurus & Scorpio

The North and South Node of the Moon have been revered as significant points in Astrology by the various cultures and civilizations throughout history. Today they continue to serve as guiding posts, anchoring the direction of any journey. The North Node and South Node of the Moon are points of intersection between the Moon's orbit and the plane of the Ecliptic. These points of intersection shift along the Ecliptic changing signs every 18 months, and as they do, they point to cycles of collective soul intention and evolution, bringing a new focus to our collective attention.

In this lecture we will seek to understand what the shift of the Lunar Nodes into Taurus and Scorpio means for the world, and how they will set the tone for the transits of 2022.

We will also look at their influence and deeper message in your personal life, and in the lives of your loved ones. Please have your Astrological birth chart and the chart of loved ones handy to follow along and understand more. Understanding the shift of the Lunar Nodes into Taurus and Scorpio will direct you into deeper purpose with the transits of 2022.
