Eric Frances Coppolino

"Pluto in Aquarius and the Digital Environment"

We might consider that the effects of the now-total digital environment are the single most important spiritual issue faced by humanity. This is not about gadgets; it's about their influence on how we think, what we feel, and how we relate to one another.

In just a few years the internet went from being a thing you would occasionally connect with, to something infusing the totality of our lives, our relationships and our state of mind. It is an extended nervous system that merges all people and institutions into a continuous web of consciousness that moves at the speed of light.

Aquarius is the sign that represents social patterns, groups of all kinds and the relationship between the individual and the group. And, it also represents the wave-based electrical environment which has swallowed both our collective and individual relationships. What then are the implications of Pluto entering Aquarius?

"I'll use a combination of astrology and the media theory of Marshall McLuhan (the medium is the message) to consider the potential of what this transit might be about. Pluto has a way of transforming and deepening whatever it touches. It can also represent the expression of raw power. I'll be considering the possibilities in this conversation for astrology students on any level of study."

BIO: Eric Frances Coppolino is the world's only horoscope writer to carry international press credentials. His columns have appeared everywhere from the *NY Daily News* to the *London Daily Mirror*. Since 1983, his investigative features have focused on scientific fraud and corporate crime, and have appeared in the *New York Times*, the *Village Voice*, *The Ecologist*, *The Mountain Astrologer*, and many other top international publications. He lives in Kingston, New York.
