As The Wheel Turns: Human Design & Global Cycles (What's the big deal about 2027?)

We are on the cusp of a shift in the global cycle. According to Human Design, for the past 400 years, we have been living under the Cross of Planning. That's an era that carries a tribal background frequency where social connection, being helpful in society, and bringing value to other humans ensures our survival. And that social safety net is ending in two years' time. In 2027, the Cross of Planning ends and a new era begins. We are moving from tribal frequency to the individual energy of the Cross of the Sleeping Phoenix. This shift will require each person to learn to rely on Spirit and their own inner guidance. The more awakened you are (connected with Spirit and living your Human Design), the more you will thrive in 2027 and beyond.

With perspective gleaned from not only her astrological practice but also Human Design, Debbie will share fresh insights about **how current astrological transits** relate to this global shift fast approaching, including: * Nodal shift into Pisces/Virgo * Pluto ingress Aquarius * Uranus ingress Gemini * Neptune & Saturn on the Aries Point * Year of the Wood Snake

BIO: With her Gemini Moon and Mars, Debbie Barnett has always been an autodidact, or self-taught learner. She began studying astrology when she was barely old enough to read. At age 7 or 8, she began memorizing the 12 signs and their corresponding birth dates from her Aquarius mom's kitchen matches. Debbie began practicing yoga from a book in 1979 at age 16, and began teaching in 2001.

As a Human Design Projector, Debbie combines astrology, Human Design, and yoga philosophy to create unique readings where people feel truly seen and recognized. You can find her on Facebook as ***Astro Yoga Woman***.

Lunar Wisdom – Facing the Darkness Within

The Moon is a mythic symbol that holds unconscious memories and stories from time immemorial. Since the dawn of civilization, every culture has gazed at the Moon and wondered about its ever-changing face in the night sky.

The Great Mother holds the keys of meaning to our inner self and much is revealed by examining the aspects. The Moon tells the story of our first primal relationship with our mother. This is formative as it lays the groundwork for future relationships. Yet its influence may remain elusive, often working in the shadows until awareness sets in.

The Moon represents a rich territory of meaning surrounding mother, nurturance, safety, security, ancestry, and the emotional body. Her symbolism is foundational to our inner life, the story we tell ourselves, and our security within the world.

Nothing can bring us to our knees and challenge us to grow other than the hard aspects of the Moon. We all have trials and challenges, but bringing them into the light can be incredibly healing. Isn't this why we all were attracted to astrology, to begin with?

Whether a newbie or a skilled pro, join Sara as we unpack the symbolism and the hard aspects of the Moon. It's always good to circle back around to the Moon's wisdom. Bring any charts you want to examine as you follow along.

BIO: Currently, Sara is writing a book on the deep symbolism of the Moon including material covering ancestral healing and epigenetics. As a shamanic practitioner, she is deeply committed to a magical approach. Drawing from spiritual wisdom and blending it with scholarly research is the quintessential balance between the heart and mind.

Sara is an intuitive astrologer, writer, and speaker who serves clients in a spiritual consulting practice. She's taught at OPA's I-Astrologer Conference and will be speaking at the AstroBiz Summit in April. She speaks regularly for metaphysical groups and has written for the Career Astrologer. She is certified by the Organization for Professional Astrology and is a member of the Tucson Astrologers' Guild. Sara writes astrology articles on Substack and videos on her YouTube channel @sarabourland. She can be reached through her website sarabourland.com or via Instagram, @sarabourland.astrology.
